SUBJECT : RECOMMENDATION

Dear Sirs,

On the basis of our previous work with KESH - ALBANIAN POWER CORPORATION, and Mr. Genc Gjergjani as a project manager for Drin River Cascade Rehabilitation Project and other projects in Albania (Autotransformer 120 MVA for Tirana Substation, Generator Transformer 150 MVA for Hydro Power Plant "Fierza" and others), we can give our best recommendations for his work.

Working with him for some time we have become convinced that Mr. Gjergjani is conscientious and honest collaborator with remarkable technical knowledge and experience in this kind of work. He keeps his promises and fulfils his obligations in time, with a view to solve any problems and deficiencies for the optimum realisation of a project. His knowledge of English is excellent and he also uses all computer programmes necessary for his work.

We can recommend Mr. Gjergjani as expert with technical, commercial and financial experience, who can meet any requirements in his future job.

Yours faithfully,

KONČAR - POWER PLANT AND
ELECTRIC TRACTION ENGINEERING Inc.

Director

Vladimir Plečko, M.Sc.
